

Isolator[®] Synergy Access[®]

*Synergy Technology,
Improved Articulation*

AtriCure

Isolator Synergy Access

Isolator Synergy Science

Ground-breaking Synergy Science uses two pair of alternating bipolar electrodes to maintain resistive heating between the four poles. An initial lesion is formed where the RF energy fields overlap and continues until a robust, column shaped lesion is produced.

Consistent Tissue Compression

- + Minimal Tip Splay (<0.06")
- + 0% Jaw Deflection

- = True Parallel Closure

Jaw Articulation

The Synergy Access jaw rotates 30 degrees upward and 30 degrees downward to enable ease of access in even the most difficult anatomy.

Isolator Synergy Access

Product Code

EMT1

*Includes Glidepath Tape
