

Current ICD-10 Diagnosis Codes for Atrial Fibrillation

To conduct an electronic audit of your EMR or patient database:

- Program the guidelines protocols into EMR/Patient Database for identification
- Flag all
- Define any further parameters and run report

Identify all departments:

- Emergency Room
- General Cardiology Clinic
- Heart Failure Clinic
- Sleep Apnea Clinic

Current ICD-10 Diagnosis Codes:

I48 Atrial Fibrillation and flutter

- I48.0 Paroxysmal atrial fibrillation
- I48.1 Persistent atrial fibrillation
- I48.11 Longstanding Persistent atrial fibrillation
- I48.19 Other persistent atrial fibrillation
- I48.2 Chronic atrial fibrillation
- I48.20 unspecified
- I48.21 Permanent atrial fibrillation
- I48.3 Typical atrial flutter
- I48.4 Atypical atrial flutter
- I48.9 Unspecified atrial fibrillation and atrial flutter
- I48.91 Unspecified atrial fibrillation
- I48.92 Unspecified atrial flutter

The material provided is intended to educate and provide general information identifying the clinical value of AtriCure's Technology and procedures in which they are used. The enclosed material is intended to provide objective information about the use of AtriCure's Technology, including where and how the device can be used within the continuum of care, general information of available reimbursement revenues and general associated costs. Any detailed discussions surrounding procedural costs and/or reimbursement should be directed to the AtriCure Economics and Reimbursement team, healthconomics@atricure.com.

1. ICD-10 code 148.0 replaced the ICD-9 code in October 2015. If you wish to include patients not seen since January 2016, you are advised to run an audit with both codes.
